

Basic Detail Report

De Laval Cream Separators

Date

c. 1900-1940

Medium

Silver image glass plate sealing tape

Description

Title on slide says, "Illustrating Progress in Cream Separator Development." Under the illustration on the left, the caption says, "The First Practical Hand Power De Laval Cream Separator. This machine which was used in 1886 was of the hollow bowl type and had a capacity of

approximately 150 pounds of milk per hour. Price of this machine was \$125." Under the illustration on the right, the caption says, "The Latest Type De Laval Cream Separator. This machine, which has about the same general dimensions as the one illustrated opposite, has an actual capacity of 675 pounds of milk per hour. Cost \$90." Slide and images are Courtesy of the Educational Department at The De Laval Separator Company - as noted at the bottom of the slide. Image is an illustration of the two machines with respective captions.

Dimensions

Overall: 3 1/4 x 4 in. (8.3 x 10.2 cm)
