

Basic Detail Report

William Henry & Sons, 1904

Date

1916

Medium

photographic print on heavy paper

Description

Two men sit under the awning, on the porch of William & Sons barn. The porch and awning are along the side of the barn. The barn features a gambrel roof, vertical siding with a small back shed attached. The large roof has wooden shakes, while the awning appears to be made of corrugated metal. The men sit with their legs dangling over the edge of the porch. They are both dressed in pants, and long shirts, work boots, and hats.
